

Satellite radio, like XM, is a new and wonderful change in this nation. The service it provides is 1000's of times better than any local radio station. I do not support NAB's petition 04-160. The NAB is starting to realize that satellite radio, and internet streaming is starting to take business away from them. XM is just one of the many companies that keep competition strong. I urge you not to let the NAB lobbyists dictate what the consumer, the people of the US expect and want.

Thank you,

Matt Carpenter
